Drug & Alcohol Service for London

## **Leading charity selects award-winning email and file encryption software from Egress to secure confidential information**

Based in East London, registered charity Drug & Alcohol Service for London (DASL) helps communities and individuals tackle the problems caused by drug and alcohol misuse through education, raising awareness and therapeutic services. Over recent years, DASL has extended and enhanced service provision for those with drug and alcohol problems, and consequently increased the network of third party organisations they work with.

### **The Challenge**

Michael O’Dwyer, DASL Newham Community Drug & Alcohol Team Senior Manager, explains: “DASL works alongside a range of external organisations, including health and social care providers. Protecting the sensitive

## A top priority

“Protecting the sensitive information we share with these partners is a high priority, and as such, DASL examined a range of email and file encryption software.”

## Remain in control

Offering real-time auditing, as well as date and time restrictions, and the ability to revoke access to secure packages, Email and File Protection enables users to remain in control of the information they share.

## Increased efficiency and cost savings

“We recognise that data security is going to be on the agenda for many organisations in 2014, particularly when it involves vulnerable individuals, so it is great to see charities such as DASL taking proactive steps to secure the information they share. In doing so, DASL are ensuring they protect both end-users and staff from data breaches, as well as improving the speed of communication, which hopefully will result in long-term efficiency gains and cost savings.”

and as such, DASL examined a range of email and file encryption software. As well as being secure, we were aware that our chosen solution would need to be simple for both DASL staff and their recipients to use. Integrating with MS Outlook, Egress Email and File Protection absolutely meets this requirement, making it a convenient mechanism for sharing confidential information securely.”

## The Solution

Offering real-time auditing, as well as date and time restrictions, and the ability to revoke access to secure packages, Email and File Protection enables users to remain in control of the information they share. Integrating with a range of email clients, including Microsoft Outlook, Email and File Protection removes barriers to information security and simplifies the data sharing process. Moreover, using a community-based licensing model known as the Egress Trust Network, recipients of encrypted emails can communicate securely free of charge with paying subscribers, offering end-to-end encryption throughout the data sharing process.

Commenting on the announcement, UK Sales Manager Kelly McCann stated: “DASL’s decision to select Egress reflects the growing requirement amongst UK charities to secure the highly sensitive information they share with third parties. We recognise that data security is going to be on the agenda for many organisations in 2014, particularly when it involves vulnerable individuals, so it is great to see charities such as DASL taking proactive steps to secure the information they share. In doing so, DASL are ensuring they protect both end-users and staff from data breaches, as well as improving the speed of communication, which hopefully will result in long-term efficiency gains and cost savings.”

## About Egress Software Technologies

Egress Software Technologies is the leading provider of privacy and risk management services designed to manage and protect unstructured data.

Offering Government and Enterprise customers a portfolio of complementary services, the Egress platform leverages machine learning led policy management, encryption and eDiscovery to enable end-users to share and collaborate securely, while reducing the risk of loss and maintaining compliance. These award-winning integrated services include email and document classification, accidental send prevention, secure email and file transfer, secure managed file transfer, secure online collaboration and secure archive.

Certified by Government, Egress offers a seamless user experience, powerful real-time auditing and patented information rights management, all accessible using a single global identity.
