

US State of Delaware selects Egress to replace Cisco IronPort email encryption

US State selects leading email and file encryption solution to cater for an on-premise and hosted Microsoft Office 365 environment.

Following Cisco's announcement to end-of-life IEA, forward-thinking State of Delaware identified the need for a replacement solution that could cater for a mixed environment of on-premise Microsoft Exchange for state side users and Office 365 for K12 educational users.

The Switch solution helps Delaware meet this need Egress delivering a combination of encryption services designed to complement their hybrid environment. Once deployed, Email and File Protection will enable State and K12 Education users to leverage single sign-on through Active Directory Federation Services (ADFS) when accessing and sharing confidential information via email, using desktop, mobile, or web based applications, without changing end user behavior.

Egress Software Technologies Inc., a leader in encryption services, announces that US State of Delaware is replacing its email and file encryption solution, Cisco IronPort Encryption Appliance (IEA), with Egress Email and File Protection. Following Cisco's announcement to end-of-life IEA, forward-thinking State of Delaware identified the need for a replacement solution that could cater for a mixed environment of on-premise Microsoft Exchange for state side users and Office 365 for K12 educational users.

The Egress solution helps Delaware meet this need by delivering a combination of encryption services designed to complement their hybrid environment. Once deployed, Email and File Protection will enable State and K12 Education users to leverage single sign-on through Active Directory Federation Services (ADFS) when accessing and sharing confidential information via email, using desktop, mobile, or web-based applications, without changing end user behaviour.

About Egress Software Technologies

Egress Software Technologies is the leading provider of privacy and risk management services designed to manage and protect unstructured data.

Offering Government and Enterprise customers a portfolio of complementary services, the Egress platform leverages machine learning led policy management, encryption and eDiscovery to enable end-users to share and collaborate securely, while reducing the risk of loss and maintaining compliance. These award-winning integrated services include email and document classification, accidental send prevention, secure email and file transfer, secure managed file transfer, secure online collaboration and secure archive.

Certified by Government, Egress offers a seamless user experience, powerful real-time auditing and patented information rights management, all accessible using a single global identity.
