

Installing the Egress plug-in for Outlook and Gmail

The Egress Client integrates seamlessly with Microsoft Outlook and Gmail for easy-to-use email encryption. All Egress software is free to download and is compatible with Windows Vista/7/8/10 and Outlook 2007/2010/2013/2016.

The Egress Client for Outlook

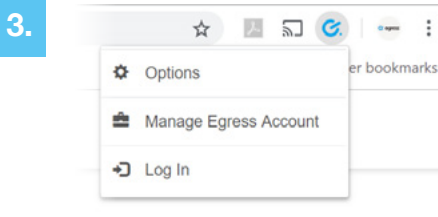

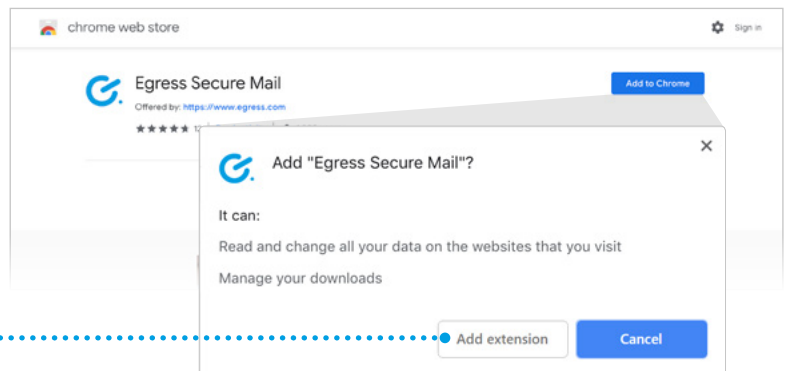

1. Visit www.egress.com/downloads/desktop and select the **Download** button beneath the **Egress Client** column.

2. Once the software has been downloaded, open up the downloaded folder and complete the installation process following the onscreen instructions.
3. During the installation process, you will have the option to integrate with Outlook. If this is a requirement of yours, simply ensure the integration tick box is selected.

The Egress Client for Gmail

1. Visit www.egress.com/downloads/desktop and select the **Get our Chrome app** button in the **Do you use Google Chrome?** section. You will be directed to the Chrome Web Store.
2. Press the **Add to Chrome** button, and then select **Add extension** in the dialog box that appears. The Egress Client for Gmail icon will appear in the top corner of the browser window.

Select the icon and choose **Log In** to enter your Egress ID credentials and sign in to the service. The Egress Client for Gmail is now ready to use. See [How to send secure emails in G Suite using the Egress platform](#) for more information.

Learn more about Egress Email and File Protection

Visit www.egress.com/online-tutorials for video tutorials on using Egress Email and File Protection, including how to:

- Access a secure message
- Manage your messages and control access to them in real time
