

# How to send and receive secure emails using the **Egress Android app**

Please note, the Egress Android app requires Android V4.0 and above. Download the app for free from the Google Play Store.

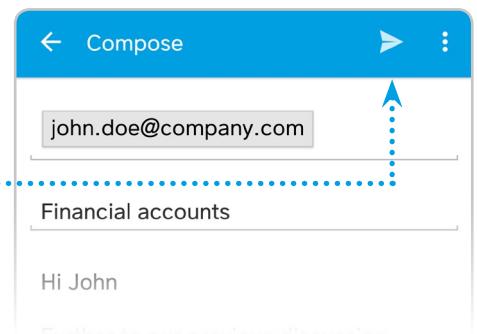

## Accessing an encrypted email

1. Navigate to the encrypted message in your email app inbox and select the **.switch** attachment. The Egress Android app will open automatically to display the secure email.
2. You will be able to view any message attachments by selecting the **Attachments** tab.
3. If required, select the arrow button to reply securely to the email.

## Sending an encrypted email

1. Open the Egress Android app and select the **Create Message** icon to open a new blank email.
2. Complete the **To**, **Cc** and **Subject** fields as required, attaching any necessary files. Fill in the message body and select **Send** to send the email securely.

## Learn more about Egress Secure Email and File Transfer
