

# Egress Secure Web Form

Optimise and **protect sensitive data submissions** entering your organisation.

Third parties regularly need a single point of contact to share sensitive information, including large files, with organisations. Documents such as proof of identity, client files and corporate information all need to be shared securely, and organisations need to audit and control this data to manage risk and uphold data privacy.

Egress Secure Web Form simplifies information sharing to enable third parties to quickly and easily upload and submit content in a protected format. Our fully customisable forms empower organisations to:

## Protect inbound data

Secure sensitive information and files entering your organisation.

## Remove unnecessary costs

Remove costs associated with physical data transfer and improve security.

## Increase data transfer efficiency

Make sensitive data transfer quick and easy for third parties.

## Comply with data protection regulations

Provide data subjects with a secure channel to request information, including proof of identity.

## Secure information submissions made simple

We encrypt all content and form details uploaded via Secure Web Form, regardless of their storage destination. We scan all attachments for viruses to protect your corporate network, and can also restrict file types and put in place additional user verification for enhanced security.

Administrators are able to closely monitor all user activity and uploads taking place using our detailed audit logs and reporting notifications.

Securing  
**1,000+**  
large  
organisations

## Customisable forms with flexible hosting options

Our secure online forms are fully customisable, giving you the ability to brand according to your corporate guidelines and also choose which data fields to include. It's also possible to restrict the data types uploaded.

You can choose where to host both your web form and the files that third parties securely share with you, whether that's in the cloud, on-premise or via a hybrid of both. Seamless integration with Egress Secure Workspace simplifies secure online file receipt, storage and management.

**"All submissions can be tracked and audited, and confirmation receipts can be generated so that the user supplying the information can be confident that it has been received."**

## Top features

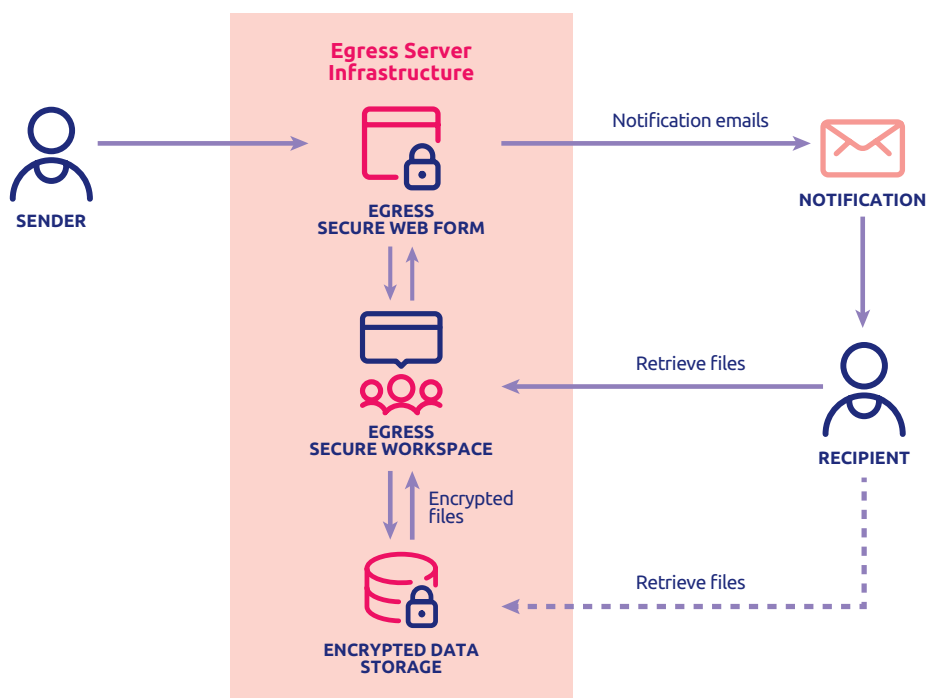

- 1 Fully customisable forms, including file type restrictions
- 2 AV checks for all files submitted
- 3 Seamless mobile experience
- 4 Detailed auditing and reporting
- 5 API integration with Egress Secure Workspace and established workflows

Visit [www.egress.com](http://www.egress.com) for more features.

## Easy transfer of sensitive data into your organisation

Our secure forms are user-friendly and free for third parties, reducing the time needed to share sensitive files and avoiding the costs associated with physical transfer. They can also be accessed via mobile devices and don't require user sign up.

Administrators benefit from tools to easily organise the files they receive in their secure storage location, while automation provides further efficiency and cost savings for the file upload and management process.
