

# How to send and receive secure emails using the Egress Android app

Please note, the Egress Android app requires Android V4.0 and above. Download the app for free from the Google Play Store.

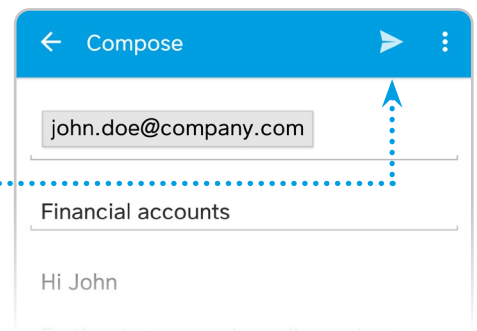

## Accessing an encrypted email

1. Navigate to the encrypted message in your email app inbox and select the **.switch** attachment. The Egress Android app will open automatically to display the secure email.
2. You will be able to view any message attachments by selecting the **Attachments** tab.
3. If required, select the arrow button to reply securely to the email.

## Sending an encrypted email

1. Open the Egress Android app and select the **Create Message** icon to open a new blank email.
2. Complete the **To**, **Cc** and **Subject** fields as required, attaching any necessary files. Fill in the message body and select **Send** to send the email securely.

## Learn more about Egress Protect

Visit [www.egress.com/online-tutorials](http://www.egress.com/online-tutorials) for video tutorials on using Egress Protect, including how to:

- Access a secure message
