

How to send and receive secure emails using the Egress iOS app

Please note, the Egress iOS app supports all generations of the iPad and iOS 5.0 or later versions on iPhone.

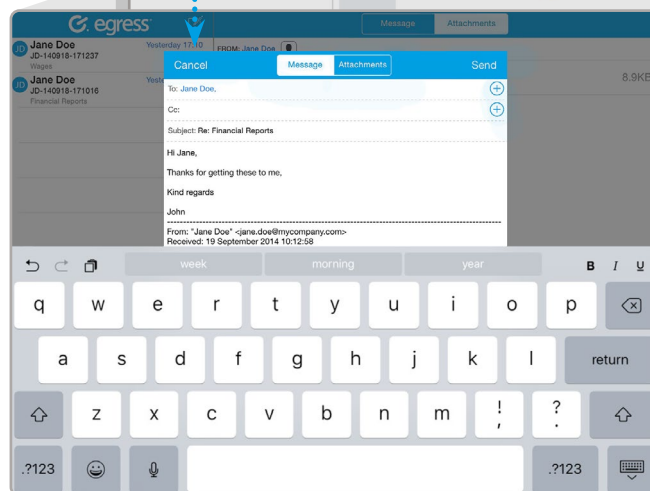

Accessing an encrypted email

1. Navigate to the encrypted email in your email app inbox and click the **Open secure email** button. The Egress iOS app will open automatically to display the secure email.
2. If required, select the **Reply** arrow button on the top right of the Egress app to reply securely to the email.

Sending an encrypted email

1. Open the Egress iOS app and select the **Create Message** icon to open a new blank email.
2. Complete the **To**, **Cc** and **Subject** fields as required, attaching any necessary files. Fill in the message body and select **Send** to send the email securely.

Learn more about Egress Protect

Visit www.egress.com/online-tutorials for video tutorials on using Egress Protect, including how to:

- Access a secure message
- Manage your messages and control access to them in real time
- Send large files securely
