egress

Egress Secure Workspace for mobile

Instantly and securely **upload data on the go** to improve efficiency and response times.

Gathering sensitive media out of the office, then returning to upload and share data, can be a highly inefficient process. When under pressure to rapidly respond to time-critical incidents, you need a faster – yet secure – solution.

Secure file sharing on the go

Secure Workspace for Mobile allows users to capture and upload media to Secure Workspace using a mobile device, wherever they're working from. Data can be instantly uploaded when users are connected to a network, enabling quick and secure data sharing.

Giving you time back with offline performance in the field

Working somewhere without any mobile or WIFI connectivity? Secure Workspace for Mobile's offline functionality moves all captured imagery and videos into a queue to automatically sync with Secure Workspace as soon as connectivity returns. This means no more additional time wasted manually uploading footage when users are back in the office.
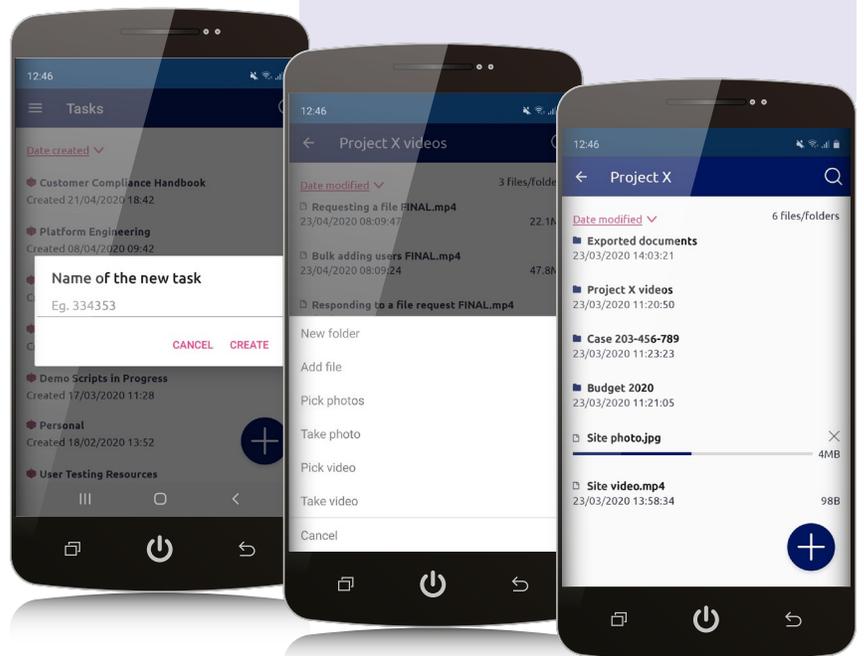

"

Without Egress, we would have had to buy at least five different systems to meet our information sharing requirements.

Head of Information Governance and Security, HCA Healthcare

Key benefits

- Stay productive when out of the office and respond to real-time needs

- Dramatically cut hardware costs by reducing the number of required devices

- Minimize time spent uploading media when back in the office

- Prevent unauthorized access to sensitive media with secure permissions and controls

Keeping costs low with shared device functionality

Secure Workspace for Mobile has been specifically programmed for multiple users to access the app with their own unique credentials via a shared device.

Faced with never-ending pressures to cut costs where possible, you can reduce the number of devices required by your team and, importantly, remove hardware costs from the balance sheet.

Seamless integration with Secure Workspace

The app seamlessly integrates with Secure Workspace to keep data safe from compromise. There's a robust audit trail for all uploaded media, while setting expiry and deletion dates for uploaded content keeps you firmly in control. In addition, you can bypass your device's camera roll by sending photos and videos directly to Secure Workspace, while a recall option instantly removes others' access to a specific upload. This minimizes the risk of anyone sharing sensitive content while, in the event of a breach, you can limit any subsequent financial penalty by showing evidence that preventative actions were taken.

About Egress

Our mission is to eliminate the most complex cybersecurity challenge every organization faces: insider risk. We understand that people get hacked, make mistakes, and break the rules. To prevent these human-activated breaches, we have built the only Human Layer Security platform that defends against inbound and outbound threats. Used by the world's biggest brands, Egress is private equity backed and has offices in London, New York, and Boston.
